Handle widespread integration needs.
Collections organizations can’t run without integration – from the collector desktop to the contact center, back-end systems, and out to vendors and partners you rely on. Add compliance and the drive for operational efficiencies, and integration becomes a foremost consideration.

Begin at the desktop.
Interaction Collector from Interactive Intelligence is a browser-based desktop application capable of managing the entire debt lifecycle – from early-stage delinquency through post charge-off. Pre-built interfaces connect to industry-leading data, dialer, letter, and payment vendors – allowing for faster deployments and more seamless workflows.

On the back end, Collector uses generic, standard-based protocols for integrating and communicating with other internal and external systems and data. Access collections and recovery analytics, and rapidly create and execute import/export jobs to-and-from disparate systems and sources.

Dialer integration is key.
Patented predictive algorithms and advanced call analysis capabilities are at the core of Interaction Dialer from Interactive Intelligence. Pre-built integration to Dialer provides screen-pop to the Collector desktop as well as single-entry disposition and notes for agent efficiency. Cross-campaign real-time account updates maintain compliance and improve the integrity of multi-day scheduled callbacks and account status.

Get all-in-one contact center capabilities.
Add anything else needed for the contact center with Customer Interaction Center™ (CIC). Choose from inbound/outbound ACD, IP PBX (with presence insight), IVR, call and screen recording, real-time speech analytics, agent scheduling and more.

From chat to callback.
Expand your contact channels, and bolster your ability to connect with the consumer. Deploy new channels as needed – SMS, chat, email. With our all-in-one solution, it’s as easy as a click.

Something for everyone.
The pre-integration from Collector to Dialer and the all-in-one inherent design of Customer Interaction Center offer something for everyone.

For the collector
- Desktop PBX call controls, including look-ahead transfer, presence management, and dial pad
- Inbound screen pop from Interaction Dialer to Collector’s desktop
- Single disposition with integrated account notes
- Manual call capability through ACD/PBX integration

For your collections center operations
- Multi-day scheduled call backs
- Cross-campaign account status change or removal

The benefits abound.
- Improve agent efficiency with single disposition and notes entry
- Maintain compliance and increase efficiency by removing all accounts real-time across multiple campaigns when status change occurs
- Deploy one or more new channels as needed – SMS, chat, email and more
- Increase accurate intra-day reports with real-time agent and Dialer results fed back into Interaction Collector
- Offer cost savings with browser-based desktop, optional USB headsets

Pre-packaged solution with Interaction Dialer and contact center functionality on the left; Interaction Collector work screen on the right.
Interactive Intelligence offers unified business communications solutions for contact center automation, unified communications, and business process automation, based on our open standards, all-in-one software suite. More than 5,000 organizations worldwide currently benefit from our on-premises solutions, our cloud-based Communications as a Service (CaaS) offerings, or both, including value-added services for software, hardware, implementation, consulting, support and education.

At Interactive Intelligence, it's what we do.
